

Antonella D'Orazio received the laurea degree in Electrical Engineering, *summa cum laude*, from the University of Bari in 1983 and the Ph.D. degree in Electromagnetics in 1987. Since 1983, she joined the Integrated Optics Laboratory, Dipartimento di Elettrotecnica ed Elettronica – Politecnico di Bari (Technical University – Bari). She became an Assistant Professor in 1990 and an Associate Professor in 1998). Since December 2003 she is full professor of Electromagnetic Fields at Politecnico di Bari. She has been involved in several national and international projects and co-operations. She acts as Reviewer of International Journals. She has been member of technical committees of international and national conferences. She acts as evaluator of national and international research projects. Her research interests include linear and nonlinear guided optic propagation, modeling and numerical methods for the design of linear and nonlinear integrated optic devices, design, fabrication and characterization of microwave devices and antennas, modeling, fabrication and characterization of photonic crystal devices, metamaterials, plasmonic structures and graphene based devices. She has co-authored over 240 publications published on indexed journals and international conferences proceedings.
