

Curriculum vitae of Gianpiero Dalla-Zuanna

Gianpiero Dalla-Zuanna was born in [REDACTED]. After his degree in Statistics (1984), he worked for 3 years as junior researcher in the Regional Administration of Venice. During 1988-90 he studied for PhD in Demography at the University of Florence. He worked as Researcher in Demography and Statistics at the University of Rome La Sapienza (1990-98), and as Associate Professor at the University of Messina (in Sicily) and Padua (1999-2004). Since 2005, he has been full professor in Demography at the University of Padua (Italy). In October 2009 – December 2011 he was dean of the Faculty of Statistics.

Starting from 1988, his main research field is the marital and reproductive behavior in the developed countries. He has used several quantitative methods, dealing with both individual and territorial data, adopting both a descriptive and an interpretative approach.

He collaborated with Italian scholars of other disciplines (economists, sociologists, statisticians) with the aim of better understanding the causes of Italian marital and reproductive behavior. During 1990-98 he participated to the Italian Fertility and Family Survey. During 2000-05 he coordinated an international survey on the sexual behavior of university students. In 2017 the survey has been repeated, and Dalla-Zuanna is in the board of the research. During 2005-09 he coordinated ITAGEN2, the first Italian survey on Second Generation Immigrants. He coordinated several other statistical sampling surveys, on different topics. He is expert of sampling and missing values problems.

He is specialist in historical demography, mainly about the European population during the Middle Ages and the population of Veneto during the 19th century.

He spent some research periods in Tokyo and Moscow, with the aim of comparing Italian, Japanese and Russian marital and reproductive behavior, collaborating with Japanese and Russian demographers. In the period June-September 2004 he was visiting researcher at the ANU (Australian National University) in Canberra, studying – from a general viewpoint – the connections between social mobility and fertility and the reproductive behavior of Italians living in Australia. In June-July 2018 he was visiting research in the University of Melbourne.

He has been member of the Italian Statistical Society from 1.4.87, the IUSSP from 1.1.92, the EAPS from 1.1.93, the Italian Society of Historical Demography from 28.4.94. During 1992-2008 he was in the editorial boarding of *Genus*, and during 1994-98 he was the executive editor. During 2008-2012 he was associate editor of the *European Journal of Population*.

He was member of the MIUR central commissions of ASN (2011-15) and PRIN (2017-19).

He participated (as speaker, discussant and organizer) at many International and National Conferences and Workshop on Population Issues (the Conferences of the Population Association of America at Minneapolis, Philadelphia, Los Angeles and New York; the IUSSP conference at Florence, Salvador de Bahia, Tours, Busan, Cape Town).

During the period 2007-08 he was official consultant for Demography of the Italian Ministry for the Family Policies. In this position, he represented Italy in the European Commission for Demographic Issues, at Bruxelles. During 2013-2018 he has been member of the Italian Parliament.
