

## **Short CV – Lucanos Strambini**

Lucanos Strambini (male): Researcher at the Institute of Electronics, Computer and Telecommunication Engineering of the CNR, Electronic Engineer and PhD in Information Engineering (University of Pisa). Since 2009 L.S. has been professor of "Biomedical Electronics" (Biomedical Engineering) and "Instrumentation Electronics" (Electronic Engineering) at the School of Engineering of the University of Pisa. His main research interests concern the design, modeling, fabrication, and characterization of novel materials (organic and inorganic) and devices, as well as their synergic integration to get complex systems at the micro and nanoscale for microelectronics, sensing (i.e. environmental monitoring and bio-sensing), energy harvesting and optical/photonic applications.
