Tabella 2.1 - Numero di prodotti conferiti, attesi e mancanti per SSD (sub-area non bibliometrica). Per SSD si intende il settore scientifico disciplinare di afferenza del soggetto valutato. Il numero di prodotti attesi è stato calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. Il numero di prodotti conferiti contiene il numero di prodotti effettivamente sottomessi.

Tabella 2.2 - Numero di prodotti conferiti, attesi e mancanti per SSD (sub-area bibliometrica). Per SSD si intende il settore scientifico disciplinare di afferenza del soggetto valutato. Il numero di prodotti attesi è stato calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. Il numero di prodotti conferiti contiene il numero di prodotti effettivamente sottomessi.

Tabella 2.19: Percentuale di prodotti di ricerca valutati attraverso la peer review, la bibliometria e con entrambi i metodi di valutazione (sub-area bibliometrica). Per prodotti valutati in bibliometria si intendono prodotti che hanno una valutazione bibliometrica secondo i criteri del GEV valutante (anche non conclusiva, cioè IR). Per prodotti con doppia valutazione si intendono i prodotti che sono stati sottoposti ad entrambi i metodi di valutazione (peer review e bibliometria). Le percentuali della tabella non tengono conto dei prodotti penalizzati. Per prodotti penalizzati si intendono i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottoposti), i prodotti identici presentati più volte dalla stessa struttura, i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca).

Tabella 2.23: Punteggi ottenuti e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per SSD, sub-area bibliometrica. Punteggi ottenuti e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per SSD. Per “somma punteggi (v)” si intende la valutazione complessiva del SSD ottenuta sommando i punteggi dei prodotti afferenti al SSD. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura, i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR.

### Tabella 3.37: Graduatorie delle Università divise per dimensione in base al numero di prodotti attesi dall'Area 11 (sub-area non bibliometrica): G=grandi (n ≥ 300), M=medie (299 ≥ n ≥ 100) e P=piccole (n < 100) e ordinate per voto medio (Primo indicatore I=v/n) e R (Secondo indicatore). Per “somma punteggi (v)” si intende la somma dei punteggi dei singoli prodotti; (n) indica il numero prodotti attesi; il voto medio (primo indicatore "I") indica il rapporto fra la somma dei punteggi (v) dei prodotti e il numero (n) di prodotti attesi. R (Secondo indicatore) indica il rapporto tra il voto medio ricevuto dai prodotti della Struttura e il voto medio ricevuto da tutti i prodotti dell'Area 11 (sub-area non bibliometrica). La tabella non include le strutture con meno di 10 prodotti attesi.

</table>
Tabella 3.38: Graduatorie delle Università divise per dimensione in base al numero di prodotti attesi dall’Area 11 (sub-area bibliometrica): G=grandi (n ≥ 100), M=medie (99 ≥ n ≥ 30) e P=piccole (n < 30) e ordinate per voto medio (Primo indicatore I=v/n) e per R (Secondo indicatore). Per “somma punteggi (v)” si intende la somma dei punteggi dei singoli prodotti; (n) indica il numero prodotti attesi; il voto medio (primo indicatore “I”) indica il rapporto fra la somma dei punteggi (v) dei prodotti e il numero (n) di prodotti attesi. R (Secondo indicatore) indica il rapporto tra il voto medio ricevuto dai prodotti della Struttura e il voto medio ricevuto da tutti i prodotti dell’Area 11 (sub-area bibliometrica). La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 3.39: Graduatoria degli Enti di ricerca dell'Area 11 (sub-area non bibliometrica) ordinata per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi (v)” si intende la somma dei punteggi dei singoli prodotti; (n) indica il numero prodotti attesi; il voto medio (primo indicatore "I") indica il rapporto fra la somma dei punteggi (v) dei prodotti e il numero (n) di prodotti attesi. Distribuzione percentuale dei prodotti conferiti all’Area 11 nelle quattro classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) e dei prodotti penalizzati. La tabella non include le strutture con meno di 19 prodotti attesi. R (Secondo indicatore) indica il rapporto tra il voto medio ricevuto dai prodotti della Struttura e il voto medio ricevuto da tutti i prodotti dell’Area 11 (sub-area non bibliometrica).

</table>
Tabella 3.43 - Graduatoria di Università per Filosofia, divise per dimensione in base al numero di prodotti attesi: G=grandi ($n \geq 100$), M=medie ($99 \geq n \geq 30$) e P=piccole ($n < 30$), ordinate per voto medio ($I=v/n$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include le strutture con meno di 10 prodotti attesi.

</table>
Tabella 3.47 - Graduatoria di strutture per Psicologia, divise per dimensione in base al numero di prodotti attesi: G=grandi (n ≥ 100), M=medie (99 ≥ n ≥ 30) e P=piccole (n < 30), ordinate per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 3.48 - Graduatoria di strutture per Metodi e Didattiche delle Attività Motorie e Sportive, ordinate per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 3.65 - Graduatoria di strutture per Storia della Scienza e delle Tecniche (M-STO/05), ordinate per voto medio ($I = v/n$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi ($v$)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 3.72 - Graduatoria di strutture per Psicobiologia e Psicologia Fisiologica (M-PSI/02), ordinate per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 3.73 - Graduatoria di strutture per Psicometria (M-PSI/03), ordinate per voto medio \((I=v/n)\) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi \((v)\)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punti dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 3.79: Graduatorie delle Università divise per dimensione in base al numero di prodotti attesi dall’Area 11 (sub-area non bibliometrica): G=grandi \((n \geq 300)\), M=medie \((299 \geq n \geq 100)\) e P=piccole \((n < 100)\) e ordinate per IRAS1. \((n/N) \times 100\) rappresenta la percentuale dei prodotti attesi dalla struttura rispetto ai prodotti attesi dall’area \((N:\) numero prodotti attesi dall’area; \(n:\) numero prodotti attesi dalla struttura). IRAS1 è il primo indicatore di qualità della ricerca definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da una struttura in una data area e la valutazione complessiva dell’area stessa. La tabella non include le strutture con meno di 10 prodotti attesi.

Tabella 4.1 - Graduatorie dei dipartimenti post L. 240 ordinati per voto medio ($I=\frac{v}{n}$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), divisi tra Grandi (G, con più di 100 prodotti), Medi (M, da 30 a 99 prodotti) e Piccoli (P, sotto i 29 prodotti), sub-area non bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. ($n/N$) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area ($N$: numero prodotti attesi dell’area; $n$: numero prodotti attesi del dipartimento). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

</table>
Tabella 4.2 - Graduatorie dei dipartimenti post L. 240 ordinati per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), divisi tra Grandi (G, con più di 100 prodotti), Medi (M, da 30 a 99 prodotti) e Piccoli (P, sotto i 29 prodotti), sub-area bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. (n/N) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area (N:numero prodotti attesi dell’Area; n: numero prodotti attesi del dipartimento). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

</table>
Tabella 4.3 - Graduatorie dei dipartimenti pre L. 240 ordinati per voto medio ($I=v/n$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A., Limitato -L-), divisi tra Grandi (G, con più di 100 prodotti), Medi (M, da 30 a 99 prodotti) e Piccoli (P, sotto i 29 prodotti), sub-area non bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). $R$ rappresenta il voto medio normalizzato. $\frac{(n/N) \times 100}$ rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area ($N$:numero prodotti attesi dell’Area; $n$: numero prodotti attesi del dipartimento). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

## Tabella 4.4 - Graduatorie dei dipartimenti pre L. 240 ordinati per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), divisi tra Grandi (G, con più di 100 prodotti), Medi (M, da 30 a 99 prodotti) e Piccoli (P, sotto i 29 prodotti), sub-area bibliometrica.

Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato, (n/N) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area (N:numero prodotti attesi dell’Area; n: numero prodotti attesi del dipartimento). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.5 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio ($I=v/n$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per Discipline Demoetnoantropologiche. Per “somma punteggi ($v$)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomeiti), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.7 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio \((I=v/n)\) e distribuzione dei prodotti nelle classi di merito (Eccellente - E-, Buono -B-, Accettabile -A, Limitato -L-) per Geografia. Per “somma punteggi \((v)\)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per \# prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomeuti), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia diferente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

</table>
Tabella 4.11 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per Metodi e Didattiche delle Attività Motorie e Sportive. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancati (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.12 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), divisi tra divisi tra Grandi (G, con almeno 30 prodotti) e Piccoli (P, sotto i 29 prodotti), per Psicologia. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.13 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio (I=v/n) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per Filosofia Teoretica (M-FIL/01). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.19 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio \( (I = v/n) \) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per Storia della Scienza e delle Tecniche (M-STO/05). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per \# prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sott mesi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.23 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio ($I=v/n$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L- ) per Storia della Pedagogia (M-PED/02). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancati (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.34 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio ($I=v/n$) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per Psicologia Generale (M-PSI/01). Per “somma punteggi ($v$)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR.
La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.39 - Graduatoria dei dipartimenti post L. 240 ordinati per voto medio \((I=v/n)\) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-) per Psicologia del Lavoro e delle Organizzazioni (M-PSI/06). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.42 - Graduatorie dei dipartimenti post L.240 ordinati per voto medio (I=v/n) all’interno delle strutture (elencate in ordine alfabetico) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), sub-area non bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a sottomettere. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. (n/N) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area (N: numero prodotti attesi dell’Area; n: numero prodotti attesi del dipartimento). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

### Tabella 4.43 - Graduatorie dei dipartimenti post L.240 ordinati per IRD1 all'interno delle strutture (elencate in ordine alfabetico), sub-area non bibliometrica. (n/N) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area (N: numero prodotti attesi dell’Area; n: numero prodotti attesi del dipartimento). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

</table>
Tabella 4.44 - Graduatorie dei dipartimenti post L.240 ordinati per voto medio (I = v/n) all’interno delle strutture (elencate in ordine alfabetic) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), sub-area bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando erano tenuti a sottomettere. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. (n/N) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area (N: numero prodotti attesi dell’Area; n: numero prodotti attesi del dipartimento). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

</table>
Tabella 4.45 - Graduatorie dei dipartimenti post L.240 ordinati per IRD1 all’interno delle strutture (elencate in ordine alfabetico), sub-area bibliometrica. $(n/N) \times 100$ rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area $(N$: numero prodotti attesi dell’Area; $n$: numero prodotti attesi del dipartimento). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definiti nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.46 - Graduatorie dei dipartimenti pre L.240 ordinati per voto medio ($I=\frac{v}{n}$) all'interno delle strutture (elencate in ordine alfabetico) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), sub-area non bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a sottomettere. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.47 - Graduatorie dei dipartimenti pre L.240 ordinati per IRD1 all’interno delle strutture (elencate in ordine alfabetico), sub-area non bibliometrica. (n/N x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area (N: numero prodotti attesi dell’Area; n: numero prodotti attesi del dipartimento). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.48 - Graduatorie dei dipartimenti pre L.240 ordinati per voto medio ($I = v/n$) all’interno delle strutture (elencate in ordine alfabetico) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-), sub-area bibliometrica. Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a sottomettere. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.49 - Graduatorie dei dipartimenti pre L.240 ordinati per IRD1 all’interno delle strutture (elencate in ordine alfabetico), sub-area bibliometrica. \((n/N) \times 100\) rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area \((N: \text{numero prodotti attesi dell’Area}; n: \text{numero prodotti attesi del dipartimento})\). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 4.50 - Graduatoria delle sottostrutture degli enti di ricerca, ordinate per voto medio \((I=v/n)\) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A-, Limitato -L-), sub-area non bibliometrica. Per “somma punteggi \((v)\)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per \# prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a inviare alla VQR. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. \((n/N)\times100\) rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area \(N:\) numero prodotti attesi dell’Area; \(n:\) numero prodotti attesi del dipartimento).IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. Tabella 4.52: Graduatorie delle sottostrutture degli enti di ricerca, ordinate per voto medio ($I=v/n$) all’interno delle strutture (elencate in ordine alfabetico) e distribuzione dei prodotti nelle classi di merito (Eccellente -E-, Buono -B-, Accettabile -A, Limitato -L-). Per “somma punteggi (v)” si intende la valutazione complessiva dei prodotti appartenenti alla struttura ottenuta sommando i punteggi dei singoli prodotti. Per # prodotti attesi si intende il numero di prodotti attesi calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a sottomettere. La categoria “prodotti penalizzati” contiene i prodotti non valutabili e casi accertati di plagio o frode così come previsto dal bando VQR del 7 Novembre 2011, i prodotti mancanti (cioè attesi e non sottomessi), i prodotti identici presentati più volte dalla stessa struttura e i prodotti identici presentati più volte dallo stesso soggetto valutato per due strutture di tipologia differente (es. Università ed Ente di Ricerca). R rappresenta il voto medio normalizzato. ($n/N$) x 100 rappresenta la percentuale dei prodotti attesi dal dipartimento rispetto ai prodotti attesi dell’area ($N$: numero prodotti attesi dell’Area; $n$: numero prodotti attesi del dipartimento). IRD1 è il primo indicatore di qualità della ricerca applicato ai dipartimenti definito nel Bando VQR come rapporto tra il punteggio complessivo raggiunto da un dipartimento in una data area e la valutazione complessiva dell’area stessa. La tabella non include i dipartimenti con meno di 10 prodotti attesi.

Tabella 5.1A - Graduatoria delle Università per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area non bibliometrica). Per VM si intende il voto medio dei ricercatori della struttura calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati della struttura. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<=0.2, 0.2<VM<=0.4, 0.4<VM<=0.6, 0.6<VM<=0.8, 0.8<VM<=0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2004. La tabella non include le strutture con meno di 4 soggetti valutati.

Tabella 5.1B - Graduatoria degli Enti di Ricerca per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area non bibliometrica). Per VM si intende il voto medio dei ricercatori della struttura calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati della struttura. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<=0.2, 0.2<VM<=0.4, 0.4<VM<=0.6, 0.6<VM<=0.8, 0.8<VM<=0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2004. La tabella non include le strutture con meno di 4 soggetti valutati.
Tabella 5.2A - Graduatoria delle Università per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area bibliometrica). Per VM si intende il voto medio dei ricercatori della struttura calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati della struttura. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<=0.2, 0.2<VM<=0.4, 0.4<VM<=0.6, 0.6<VM<=0.8, 0.8<VM<=0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2004. La tabella non include le strutture con meno di 4 soggetti valutati.

Tabella 5.2B - Graduatoria degli Enti di ricerca per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area bibliometrica). Per VM si intende il voto medio dei ricercatori della struttura calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati della struttura. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<=0.2, 0.2<VM<=0.4, 0.4<VM<=0.6, 0.6<VM<=0.8, 0.8<VM<=0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2004. La tabella non include le strutture con meno di 4 soggetti valutati.

Tabella 5.3B - Graduatoria dei dipartimenti degli Enti di ricerca per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area non bibliometrica). Per VM si intende il voto medio dei ricercatori del dipartimento calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati del dipartimento. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<0.2, 0.2<VM<0.4, 0.4<VM<0.6, 0.6<VM<0.8, 0.8<VM<0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2006. Sulla base del Bando, e per i soli ricercatori delle università e ricercatori e tecnologi degli enti di ricerca, il numero di prodotti attesi subiva delle riduzioni in funzione dell’anno della prese di servizio nei rispettivi ruoli. Per tutte le altre categorie, non erano previste riduzioni se non legate a determinate categorie di congedo. Nel costruire la tabella, si è identificato l’anno della presa di servizio con il numero di prodotti attesi sulla base del Bando, senza tenere conte di eventuali congedi. La tabella non include i dipartimenti con meno di 4 soggetti valutati.
Tabella 5.4A - Graduatoria dei dipartimenti ex L.240 per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area bibliometrica). Per VM si intende il voto medio dei ricercatori del dipartimento calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati del dipartimento. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<=0.2, 0.2<VM<=0.4, 0.4<VM<=0.6, 0.6<VM<=0.8, 0.8<VM<=0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2006. Sulla base del Bando, e per i soli ricercatori delle università e ricercatori e tecnologi degli enti di ricerca, il numero di prodotti attesi subiva delle riduzioni in funzione dell’anno della prese di servizio nei rispettivi ruoli. Per tutte le altre categorie, non erano previste riduzioni se non legate a determinate categorie di congedo. Nel costruire la tabella, si è identificato l’anno della presa di servizio con il numero di prodotti attesi sulla base del Bando, senza tenere conto di eventuali congedi. La tabella non include i dipartimenti con meno di 4 soggetti valutati.

</table>
Tabella 5.4B - Graduatoria dei dipartimenti degli Enti di ricerca per voto medio (VM) dei soggetti valutati (SV) e distribuzione in classi di voto medio, Area 11 (sub-area bibliometrica). Per VM si intende il voto medio dei ricercatori del dipartimento calcolato come rapporto tra la somma del punteggio medio dei prodotti presentati da ciascun ricercatore e il numero di soggetti valutati del dipartimento. Le 8 classi di voto medio contengono rispettivamente il numero dei soggetti valutati con VM<0, VM=0, 0<VM<=0.2, 0.2<VM<=0.4, 0.4<VM<=0.6, 0.6<VM<=0.8, 0.8<VM<=0.99, VM=1. Inoltre la tabella riporta il numero di soggetti valutati i cui prodotti hanno tutti classe finale E (eccellente) assunti prima e dopo il 2006. Sulla base del Bando, e per i soli ricercatori delle università e ricercatori e tecnologi degli enti di ricerca, il numero di prodotti aspettati subiva delle riduzioni in funzione dell'anno della prese di servizio nei rispettivi ruoli. Per tutte le altre categorie, non erano previste riduzioni se non legate a determinate categorie di congedo. Nel costruire la tabella, si è identificato l'anno della presa di servizio con il numero di prodotti aspettati sulla base del Bando, senza tenere conto di eventuali congedi. La tabella non include i dipartimenti con meno di 4 soggetti valutati.

| ente                  | dipartimento | # SV | Posizione in graduatoria | voto medio (VM) | % SV con VM<0 | % SV con VM=0 | % SV con 0<VM<=0.2 | % SV con 0.2<VM<=0.4 | % SV con 0.4<VM<=0.6 | % SV con 0.6<VM<=0.8 | % SV con 0.8<VM<=0.99 | % SV con VM=1 | # SV post2004 con tutti E | # SV pre-2004 con tutti E |
|-----------------------|--------------|------|---------------------------|----------------|--------------|----------------|-------------------|-------------------|-------------------|-------------------|----------------|---------------------------|---------------------------|
| IRCCS - FONDAZIONE SANTA LUCIA | n.d.        | 13   | 3 | 0.97 | 0.00 | 0.00 | 0.00 | 0.00 | 7.69 | 23.08 | 69 | 0 | 9 |
| CNR | Scienze biomediche | 9 | 7 | 0.81 | 11.11 | 0.00 | 0.00 | 11.11 | 0.00 | 78 | 0 | 7 |
| CNR | Scienze umane e sociali, patrimonio culturale | 30 | 44 | 0.49 | 16.67 | 0.00 | 10.00 | 13.33 | 16.67 | 13.33 | 17 | 2 | 3 |
Tabella 5.5 - Punteggio medio dei soggetti valutati per sub-GEV e anno di assunzione in ruolo, area 11 (sub-area non bibliometrica). Sulla base del Bando, e per i soli ricercatori delle università e ricercatori e tecnologi degli enti di ricerca, il numero di prodotti attesi subiva delle riduzioni in funzione dell’anno della prese di servizio nei rispettivi ruoli. Per tutte le altre categorie, non erano previste riduzioni se non legate a determinate categorie di congedo. Nel costruire la tabella, si è identificato l’anno della presa di servizio con il numero di prodotti attesi sulla base del Bando, senza tenere conto di eventuali congedi. I periodi di presa servizio sono quelli riportati nella Tabella 3 del Bando VQR che stabilisce il numero di prodotti attesi. Il punteggio medio è calcolato come rapporto del punteggio complessivo e il numero dei prodotti attesi. Il numero di prodotti attesi è stato calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a sottomettere.

Tabella 5.6 - Punteggio medio dei soggetti valutati per subGEV e anno di assunzione in ruolo, area 11 (sub-area bibliometrica). Sulla base del Bando, e per i soli ricercatori delle università e ricercatori e tecnologi degli enti di ricerca, il numero di prodotti attesi subiva delle riduzioni in funzione dell’anno della prese di servizio nei rispettivi ruoli. Per tutte le altre categorie, non erano previste riduzioni se non legate a determinate categorie di congedo. Nel costruire la tabella, si è identificato l’anno della presa di servizio con il numero di prodotti attesi sulla base del Bando, senza tenere conte di eventuali congedi. I periodi di presa servizio sono quelli riportati nella Tabella 3 del Bando VQR che stabilisce il numero di prodotti attesi. Il punteggio medio è calcolato come rapporto del punteggio complessivo e il numero dei prodotti attesi. Il numero di prodotti attesi è stato calcolato sulla base del SSD di afferenza dei soggetti valutati e del numero di prodotti che da bando questi erano tenuti a sottomettere.
